COURSEWORK

Module	Internet Technologies
Coursework Title	HTML Fundamentals Reference Website
Coursework Type	Practical Exercise

HTML Fundamentals Reference Website

Objective

You will create a semantic HTML only website that serves as a reference guide for the concepts covered in the first two weeks. This project will help you demonstrate both your theoretical understanding of the Internet and your practical skills with HTML.

Learning Outcomes

By completing this project, you will:

- Explain what the Internet is and how it works.
- Describe Internet services and their uses.
- Understand the role of web browsers and DNS.
- Demonstrate how to build and structure basic HTML websites.
- Apply at least 75 HTML tags with correct usage and examples.

Organize content with proper semantic HTML5 elements for accessibility and Search Engine Optimization (SEO).

Description

You are required to build a single-page reference website that includes:

1. A **summary of the following topics** (Week 01 & 02):
 - What is the Internet?
 - How the Internet works (Client-Server model, HTTP, DNS).
 - What are the main services in the Internet?
 - How the Internet is used in daily life.
 - Role of Web Browsers.
 - What is DNS and why it is important.
2. A **detailed explanation of at least 75 HTML tags**, including:
 - Purpose of each tag
 - When and how to use it
 - Example code snippet

3. Use a **semantic HTML structure**:

- <header>, <main>, <section>, <article>, <footer>, etc.
- Clear and meaningful headings and subheadings

4. (Optional) Use an **assets folder** to include images or diagrams.

Submission Requirements

- Submit your project as:
 - index.html (main file)
 - assets/ folder (if you include images or other media)
 - Compress into a single **ZIP file** for submission.
- Your project must include:
 - Coverage of **Week 01 & Week 02** topics
 - Minimum **75 HTML tags with examples**

Deadline

- The deadline for submission is available in the LMS.

Late submissions will negatively impact your academic progress and may affect your final evaluation
